ABOUT ME

I love coding and working with computers. I've always been interested in robots, engineering, and lots more. I work well with others and have good communication skills. A large part of the work I've done is sharing my knowledge and skills with others. I have spent many hours answering customer questions or even the questions of my peers.

OBJECTIVE

I choose to be part of a company that can allow me to demonstrate my existing web and software development knowledge while still offering a collaborative and welcoming environment where I can further grow that knowledge. I desire to help others by creating innovative software while having fun.

TECHNICAL PROFICIENCIES

I am most proficient in Typescript and Larvel and I have used them for numerous projects of my own. I have become very experienced in these languages and have spent considerable amounts of time increasing my understanding of them through multiple side projects.

EXPERIENCE

I am experienced in many forms of development and have spent most of my free time doing so since I was 12. Below is a list of programming languages and frameworks along with the total time that I have been using them for

Javascript	3 years	VueJS	1 year
HTML	3 years	PHP	2 years
CSS	3 years	React	1 year
Python	4 years	Laravel	2 years
Java	8 months	Next.js	1 year
Typescript	2 years		

PROJECTS

I've worked on all sorts of projects that have helped me refine and showcase my existing skill as well as help me to learn and develop new ones. Through working on a variety of projects I've learned how to work with others and act as a leader and as a learner. I've participated in projects from a support agent to a manager of development. There is a list of my current and previous projects on my website under the portfolio page (https://pekay.me/portfolio.html).

SKILLS

I am skilled at problem-solving and creating creative solutions to problems. I often work well with others because it allows me a place to brainstorm, share ideas and get feedback on those ideas and how I can improve them.
